

MANU PRATHAP

Frontend Engineer | Full-Stack Developer | AI-Integrated Web Applications

+91 70254 05061 | manuprathapkarimbil@gmail.com | linkedin.com/in/manuprathaap | Bangalore, India

PROFESSIONAL SUMMARY

Results-driven Frontend Engineer with 3+ years of experience architecting scalable, high-performance web applications using Angular (8-19+), Angular, React.js, and TypeScript. Proven track record of reducing load times by 40%+, optimizing bundle sizes, and delivering production-grade SPAs with SSR and PWA capabilities. Expanding expertise in AI/LLM integration and full-stack development (Node.js, Python, Firebase). Passionate about clean architecture, measurable performance gains, and building user-centric digital products.

TECHNICAL SKILLS

Frontend: Angular 8-19, React.js, Vue.js, TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS, Responsive Design

Performance: RxJS, NgRx, Signals, Lazy Loading, OnPush Change Detection, SSR, PWA, Code Splitting, Virtual Scrolling

UI Libraries: Angular Material, PrimeNG, Bootstrap, Chart.js, Three.js

Backend & APIs: Node.js, Express.js, Python, Django, REST APIs, GraphQL, WebSockets, HTTP Interceptors

Databases & Cloud: Firebase (Auth, Firestore, Hosting), MongoDB, MySQL, AWS (EC2, S3), Docker

AI & DevOps: LLM Integration, Prompt Engineering, RAG Pipelines, AI Agents, CI/CD, Git, Agile/Scrum

PROFESSIONAL EXPERIENCE

ElkanIO Research Labs | Frontend Engineer | Kochi, India | Dec 2023 – Dec 2025

- Architected and deployed 3 production Angular SPAs with SSR and PWA capabilities, improving Lighthouse performance scores from 62 to 94 and boosting SEO rankings for client platforms.
- Reduced initial page load time by 40% and bundle size by 35% through strategic implementation of lazy loading, OnPush change detection, and modular architecture across all projects.
- Designed centralized REST API integration layer with Angular HttpClient interceptors for token-based auth, error handling, and request/response transformation, cutting API-related bugs by 60% and standardizing data flow.
- Built scalable state management solutions using NgRx and RxJS, establishing reusable component patterns that accelerated feature delivery by 25% across the development team.
- Mentored 2 junior developers on Angular best practices, code review standards, and performance optimization, improving team code quality scores and reducing review cycles.

Exouzia | Frontend Developer | India | Jan 2023 – Dec 2023

- Developed reusable UI components and feature modules using Angular, TypeScript, and JavaScript, focusing on UX consistency and component-driven architecture for scalable delivery.
- Integrated RESTful APIs and third-party plugins to enable seamless inter-application communication, supporting real-time data synchronization and enhanced feature sets.
- Maintained clean, maintainable codebases with consistent attention to performance optimization and cross-browser compatibility across all deliverables.

KEY PROJECTS

iHub-24 – Restaurant POS System (Angular 18, Firebase, Firestore, REST API) — Built a real-time POS system with zero-refresh order updates using Firebase Firestore real-time listeners. Delivered role-specific dashboards (cashier, kitchen, admin) with live order tracking. Sole developer handling full SDLC from architecture to deployment on Firebase Hosting.

TripXOXO – Digital Travel Platform (Angular 16, RxJS, REST API, Jira) — Engineered a dynamic drag-and-drop form builder with custom reusable pipes and directives. Implemented REST API consumption with HttpClient interceptors for auth and centralized error handling. Practiced Agile sprints with AI-assisted planning.

BookOTrip – Online Travel Booking Platform (Angular 16, REST API, MySQL) — Developed admin and user modules for domestic/international flight and hotel booking with fully responsive UI. Implemented real-time booking workflows with reactive state management and REST API integration.

Stamp the Passport – Visa Application Portal (Angular 16, Signzy API, Reactive Forms) — Designed dynamic country-specific visa questionnaires with document upload workflows. Integrated Signzy APIs for passport verification with real-time identity validation. Scalable form architecture with validation, reducing manual review time by 50%.

GeoPerform – Vessel Performance Management (Angular 15, Role-Based Access Control) — Developed admin and RBAC modules for vessel performance monitoring, enabling secure multi-role user management and real-time data visualization dashboards.

EDUCATION & CERTIFICATIONS

B.Tech — Computer Science Engineering	2019 – 2022
APJ Abdul Kalam Technological University , Royal College of Engineering ,Thrissur ,Kerala,India	
Diploma — Computer Engineering	2016 – 2019
Govt. Polytechnic College Kunnampulam, Kerala , India	
Generative AI & Agentic AI	In Progress (2026)
Skills: LLM fundamentals, prompt engineering, RAG pipelines, AI agent development	
Evercity Learning - Bangalore
